RE: National Register Nomination for the Dallas Mill Village Historic District
Huntsville, Madison County

Dear Mr. Cunningham:

I am pleased to inform you that the Dallas Mill Village Historic District in Huntsville (Madison County), Alabama is to be considered by the Alabama National Register Review Board for nomination to the National Register of Historic Places on April 28, 2011. The National Register is the official national list of historic properties worthy of preservation. Listing in the National Register provides recognition and assists in preserving our nation's heritage. Enclosed is a copy of the National Register nomination and the criteria under which properties are evaluated.

Certified local governments have certain National Register notification responsibilities. Within 30 days of notification, the local historic preservation commission and the chief local elected official should transmit to the Alabama Historical Commission their opinion as to whether or not the property meets the criteria for listing in the National Register. This opinion shall constitute formal comment by the certified local government and may be as simple as an affirmative statement that, in their opinion, the property meets the criteria for listing in the National Register. However, if in their opinion the property does not meet the criteria, reasons for that opinion should be stated.

During the 30-day period, the certified local government must provide a reasonable opportunity for public comment. The measure to be taken by each certified local government would be determined by mutual agreement between the local government and the Alabama Historical Commission.

In the event that both the local commission and the chief local elected official separately determine that the property meets the criteria for listing to the National Register and recommend the property to be considered for nomination, the nomination process continues. If the local commission or the chief local elected official determines that the property does not meet the criteria for listing in the National Register, the nomination process continues. If both the local commission and the chief local elected official determine that the property does not meet the criteria for listing in the National Register and recommend the property not be nominated, the Alabama Historical Commission shall take no further action on the proposed nomination. However, if a third party files a written appeal with the Alabama Historical Commission, the nomination process must continue.

Dallas Mill Village Historic District
National Register Nomination

Owners of private properties nominated to the National Register have an opportunity to concur in or object to listing in accord with the National Historic Preservation Act and 36 CFR 60. Any owner or partial owner of private property who chooses to object to listing may submit to the State Historic Preservation Officer a notarized statement certifying that the party is the sole or partial owner of the private property and objects to the listing. Each owner or partial owner of private property has one vote regardless of what part of the property that party owns. If a majority of private property owners object, a property will not be listed; however, the State Historic Preservation Officer shall submit the nomination to the Keeper of the National Register for determination of eligibility for listing in the National Register. If the property is then determined eligible for listing, although not formally listed, the only result is that federal agencies will be required to allow the Advisory Council on Historic Preservation an opportunity to comment before the agency may fund, license, or assist a project which will affect the property. If an owner chooses to object to the listing of the property, the notarized objection must be submitted to the Alabama Historical Commission by April 27, 2011.

Please send your comments on whether the property should be nominated to the National Register to our National Register Coordinator, Susan Enzweiler, at the above address shown on the letterhead prior to the April 28, 2011 meeting. If you have any questions or comments on the nomination process, please contact me at 334/230-2667.

Very truly yours,

Elizabeth Ann Brown
Deputy State Historic Preservation Officer

CRITERIA for Historic Significance

The National Register is part of a nation-wide policy to identify, evaluate, and protect our historic resources. The program was created in 1966 when the National Preservation Act made the Secretary of the Interior responsible for maintaining the official list of historic buildings and sites important to our local, state, and or national history. National Register eligibility includes historic and architectural resources that reflect all facets of American life, especially those that are locally significant. The following criteria were written broadly to recognize the wide variety of historic properties associated with our history. The criteria should be used when preparing a National Register nomination, seeking a determination of a property's eligibility for the NR, or planning a preservation project.

The quality of significance in American history, architecture, archaeology, and culture is present in districts, sites, buildings, structures, and objects that possess integrity of location, design, setting, material, workmanship, feeling, and association, and fall under at least one of the following criteria (A, B, C, and/or D): properties that

- A. are associated with activities, events, series of events, or patterns of an area's development that have made a significant contribution to the broad patterns of our history (Agriculture, Education, Commerce, Social History); and/or
- B. are associated with the lives of significant persons in our past that represent the property most directly associated with the person's important contribution to our past (Politics, Medicine); and/or
- C. embody the distinctive characteristics of a certain building form, architectural style, engineering technique, period of physical development, use of material, or method of construction that shaped the historic identity of a property or area (Architecture, Community Planning, Engineering); and/or
- D. have yielded or may be likely to yield information important in prehistory or history (Archaeology).

Certain kinds of properties ARE NOT USUALLY CONSIDERED FOR LISTING in the National Register: cemeteries, birthplaces or graves of historical figures, properties owned by religious institutions or used for religious purposes, buildings that have been moved from their original locations, reconstructed historic buildings, properties primarily commemorative in nature, and properties that have achieved significance within the last 50 years. Such properties will qualify if they are integral parts of districts that meet the criteria OR if they fall within the following categories:

- A. a religious property deriving primary significance from architectural or artistic distinction or historical importance; or
- B. a building or structure removed from its original location but which is significant primarily for architectural value, or which is the surviving structure most importantly associated with a historic person or event; or
- C. a birthplace or grave of a historical figure of outstanding importance if there is no other appropriate site or building DIRECTLY ASSOCIATED with his or her productive life; or
- D. a cemetery that derives its primary significance from distinctive design features, from graves of persons of transcendent importance, from age, or from association with historic events; or
- E. a reconstructed building when accurately executed in a suitable environment and presented in a dignified manner as part of a restoration master plan, and WHEN NO OTHER building or structure with the same association has survived; or
- F. a property primarily commemorative in intent if design, age, tradition, or symbolic value has invested it with its own historical significance; or
- G. a property achieving significance within the past 50 years if it is of exceptional importance.

ALABAMA HISTORICAL COMMISSION
National Register of Historic Places Fact Sheet
What it Does and Does Not Mean?

The National Register Does:

1. Identify historically significant buildings, structures, sites, objects, and districts, according to the National Register Criteria for Evaluation.
2. Encourage the preservation of historic properties by documenting their significance and by lending support to local preservation activities.
3. Enable federal, state, and local agencies to consider historic properties in the early stages of planning projects.
4. Provide for review of federally funded, licensed, or sponsored projects which may affect historic properties.
5. Make owners of historic properties eligible to apply for federal grants-in-aid for preservation activities.
6. Encourage the rehabilitation of income-producing historic properties which meet preservation standards through tax incentives; discourage the demolition of income-producing properties through tax disincentives.

The National Register Does Not:

1. Restrict the rights of private property owners in the use, development, or sale of private historic property.
2. Lead automatically to historic district zoning.
3. Force federal, state, local, or private projects to be stopped.
4. Provide for review of state, local, or privately funded projects which may affect historic properties.
5. Guarantee that grant funds will be available for all significant historic properties.
6. Provide tax benefits to owners of residential historic properties, unless those properties are rental and treated as income-producing by the IRS.

For further information, contact the National Register Coordinator,
Alabama Historical Commission, 468 South Perry Street, Montgomery, Alabama, 36130-0900, 334.242.3184.

Street Addresses

The district contains the following street numbers:

Andrew Jackson Dr. NE	812 – 931
Beirne Ave. NE	320 – 604
Dallas St. NE	1110 – 1215
Dement St. NE	305 – 411, 601-603
Humes Ave. NE	300 – 603
McCollough Ave. NE	202 – 608
O'Shaughnessy Ave. NE	306 – 605
Pratt Ave. NE	401 – 603
Rison Ave. NE	500 – 722
Russell Ave. NE	906
Schiffman St. NE	305 – 801
Stevens Ave. NE	312 – 809
Ward Ave. NE	217 – 609

Narrative Description

(Describe the historic and current physical appearance of the property. Explain contributing and noncontributing resources if necessary. Begin with a **summary paragraph** that briefly describes the general characteristics of the property, such as its location, setting, size, and significant features.)

Summary Paragraph

The Dallas Mill Village Historic District is a planned textile mill village in Huntsville, Alabama and contains 248 resources of which 202 (81%) are contributing and 46 (19%) are non-contributing. In addition to 228 workers' houses and one manager's house (Inv. # 44, Photo #26), the district includes a water tower (1921, Inv. # 27, Photo #43), a stadium with turreted entrance (1934, Inv. # 7, Photos #6-7), a commissary (Inv. #106), three contributing commercial buildings (Inv. #s 1, 2 Photo #42, and 182), a church (circa 1925, Inv. # 58, Photo #31), a drainage culvert that it shares with the adjacent Lincoln Mills (circa 1900, Inv. #25, Photo #44), a water works building (circa 1945, Inv. # 2, Photo #43), and a former fire station (circa 1960, Inv. #24). The topography of the district is flat. The Dallas branch of Pinhook Creek, a narrow waterway now contained within a concrete canal, forms much of the northern boundary of the district. Interstate 565 cuts across the northwest corner of the district and separates eight resources from the remainder of the village. Despite its physical intrusion, the interstate is raised and does not destroy the visual relationship between the two areas.

Narrative Description

Description of Standard Houses Types in Dallas Mill Village

The houses in the Dallas Mill Village Inventory include several identifiable varieties that can be classified for descriptive purposes into eight basic types. Where the inventoried houses match the description of one of the individual types, they will be identified as such. Only those individual characteristics that differ from the defined type will be specified in the inventory.

Type 1: One story side gable frame duplex with a rear shed extension, two interior brick chimneys, less than full façade shed porch with wood posts, 4-bay façade with paired central entrances with transoms flanked at the outer bays by 4/4 wood double hung sash windows, continuous brick foundation. Variations and typical alterations: full façade porch, hipped porch. 26 examples, inventory #s: 11, 13, 19, 20, 40, 43, 57, 60, 84, 94, 125, 130, 131, 135, 162, 169, 183, 184, 195, 197-200, 202, 203, and 221. (Photos #14, 16, 32, 34, and 37)

Type 2: One story side gable frame duplex with a rear shed extension, central brick chimney, full façade hipped porch with wood posts, 4-bay façade with entrances with transoms at its outer bays and 4/4 wood double hung sash windows at its inner bays, continuous brick foundation. 31 examples, inventory #s: 163-168, 185-196, 201, 204-210, 212-216, and 219. (Photos #32, 38, 39, and 41)

Type 3: One story frame duplex with a gable on hip patterned composite shingle roof, 1 central brick or stucco chimney, full façade hipped porch with wood posts, four bay façade with entrances with transoms at its outer bays and two interior 4/4 wood double hung sash windows, wood weatherboard siding with shingles at its gable end, and a brick foundation. 21 examples, inventory #s: 47-56, 126, 129, 132, 133, 137, 138, 156-159, and 161. Variants or alterations include central doors with outer bay windows. (Photos #23, 29, 30, and 36)

Type 4: One story frame house with a side gable roof, large central gable dormer, exterior end brick chimney, full façade shed porch with wood supports on brick pedestals, central entrance, 3/1 double hung sash windows, wood weatherboard siding, and a brick foundation. Variations and typical alterations: bracketed eaves. 5 examples, inventory #s: 21, 59, 101, 142, and 153. (Photos # 1 and 4)

Type 5: One story front gable frame house with a less than full façade partially recessed gable porch, entrance located at side wall within porch, 3/1 double hung sash windows, wood novelty siding. Variations and typical alterations: infill of porch recess with entrance off center at façade. 30 examples, inventory #s: 9, 10, 12, 17, 29, 30, 33-36, 38, 41, 65, 73, 80-83, 89, 102, 105, 110, 112, 114, 174, 225, 229, 234, 243, and 248. (Photos #8, 10, 12, 13, 14, 15, and 17)

Type 6: One story front gable frame house, central brick chimney, full façade hipped porch with wood posts, 3-bay façade with an off-center flanked by 3/1 wood double hung sash windows, wood novelty siding, and a continuous brick foundation. Variations and typical alterations: tapered wood porch supports on brick pedestals. 11 examples, inventory #s: 8, 63, 64, 66, 116, 123, 127, 176, 177, 233, and 235. (Photos #8, 9, 14, 15, 17, and 24)

Type 7: One story front gable frame house, central brick chimney, full façade hipped porch with wood posts, 4-bay façade with paired central entrances flanked by 10/1 wood double hung sash windows, wood novelty siding, and a continuous brick foundation. Variations and typical alterations: Single family variants with one off-center entrance. 18 examples, inventory #s: 97, 111, 113, 115, 117, 118, 120-122, 124, 134, 136, 139-141, 217, 218, and 220. (Photos #19, 20, 24, 25, and 39)

Type 8: One story gable front and wing form house or duplex with a cross gable roof, central brick chimney, less than full façade shed porch with wood posts, central entrance with transom flanked by 4/4 double hung sash windows, duplex variants have second entrance at side elevation within porch, wood novelty siding, brick foundation. Variations and typical alterations: single family and duplex variants, front wing at right or left, later examples have single and double 3/1 double hung sash windows. 15 examples, inventory #s: 14, 31, 75, 85, 86, 90, 92, 93, 128, 146, 222, 223, 226, 242, and 246. (Photos #1, 10, 11, 14, and 18)

Narrative Description

The mill village is divided into two adjacent segments by Interstate 565. The mill facilities area was the original portion of the facility laid out just east of the Norfolk and Suffolk Railroad tracks and is now bounded on its eastern edge by Interstate 565. Beginning in 1891, this portion developed with construction of the first of Dallas' two mills which were destroyed by fire in 1991 and for which no above-surface structure remains. The company's water tower (1921, Inv. # 27, Photo #43), a waterworks building (circa 1945, Inv. # 26, Photo #43), a fire station (circa 1960, Inv. #24) a water diversion culvert under the railroad (circa 1900, Inv. #25, Photo #44), a small store (Inv. #182), and three houses are also located in this part of the district.

The bulk of the mill village, known originally as Lawrence Village, is located east of Interstate 565. This area was historically, and it remains, an irregular shaped area with streets (north to south) and avenues (east to west) laid out on a grid. It is bounded on the west by Interstate 565, on the south by Pratt Avenue, on the north by Rison Avenue, and to the east by an irregular boundary that is defined by Andrew Jackson Way between

Pratt Avenue and an alley to the south of Stevens Avenue and then by the rear property lines of lots fronting along Andrew Jackson Way. This portion of the district contains all but three of the village's residential resources and began development in the 1890s. Two resources (Inv. # 48, Photo #29, and Inv. # 148, Photo #2) remain from the 1890s. The area completed its historical development as a mill village between the early 1910s and 1949. Seven worker houses remain from the 1910s (Inv. #s 31, 49, 51, 128, 146, and 185), as well as the district's Colonial Revival style manager's house (Inv. # 44, Photo #26).

Besides these residential resources, this area contains both of the district's athletic facilities including the 1928 Goldsmith-Schiffman Field which was renovated in 1934 to include a turreted entrance (Inv. # 6, Photos #6-7) and a field that is now known as Bierne Avenue Park (Inv. #7), the district's only remaining church (circa 1925, Inv. # 58, Photo #31), commissary (Inv. # 106), and commercial buildings (Inv. # 1, 2, Photo #42, and 182).

Although the Dallas mills were destroyed by fire in 1991, the remainder of its associated mill village remains largely intact with residential, commercial, recreational, and religious structures extant. Many houses have applied synthetic siding (circa 1965-present), replacement windows, or have removed one duplex entrance, but most retain their overall form and identity as components of a planned grouping. Only a few houses were built after 1960.

Archaeology

An archaeological assessment of the study area was not completed as part of this project. However, given the nature of the area's history, there is potential that subsurface remains could provide additional information about the historical development of the site.

8. Statement of Significance**Applicable National Register Criteria**

(Mark "x" in one or more boxes for the criteria qualifying the property for National Register listing)

- ☒ A Property is associated with events that have made a significant contribution to the broad patterns of our history.
- ☐ B Property is associated with the lives of persons significant in our past.
- ☒ C Property embodies the distinctive characteristics of a type, period, or method of construction or represents the work of a master, or possesses high artistic values, or represents a significant and distinguishable entity whose components lack individual distinction.
- ☐ D Property has yielded, or is likely to yield, information important in prehistory or history.

Criteria Considerations

(Mark "x" in all the boxes that apply)

Property is:

- ☐ A Owned by a religious institution or used for religious purposes.
- ☐ B removed from its original location.
- ☐ C a birthplace or grave.
- ☐ D a cemetery.
- ☐ E a reconstructed building, object, or structure.
- ☐ F a commemorative property.
- ☐ G less than 50 years old or achieving significance within the past 50 years.

Architect/Builder

Period of Significance (justification)

The period of significance for the district extends from 1891, when its earliest resources were built, to 1961, the fifty year cut-off date, reflecting its continued development as a neighborhood after the closure of the mill.

Criteria Considerations (explanation, if necessary)

N/A

Statement of Significance Summary Paragraph (provide a summary paragraph that includes level of significance and applicable criteria)

The Dallas Mill Village Historic District is locally significant under criteria A (Community Planning & Development) and C (Architecture) as a planned textile mill village in Huntsville, Alabama. While the mill buildings were destroyed by fire in 1991, the mill village remains substantially intact. Begun in the 1890s and built through 1949, the village was also based on the ideas of D. A. Tompkins including his recommendation that mill villages contain a diversity of styles, worker houses be set apart from managers' houses, and that all amenities lie within walking distance to workers' homes. As such, Dallas village contains a diverse collection of textile mill village architecture that is representative of common southern mill village building types. Both the houses constructed by the mill and the later housing illustrate early to mid-twentieth century residential building typologies found in Huntsville's working class neighborhoods. The public buildings in the district, i. e., the commissary and two one part commercial blocks, the water works building and a fire station and a church are simply utilitarian in design.

Narrative Statement of Significance (provide at least one paragraph for each area of significance)

Architecture: The Dallas Mill Village Historic District is significant for its documentation of textile mill residential, industrial, commercial, religious, and recreational architecture from 1891-1949. Standard worker residential Southern mill type housing, many with Craftsman details, remain from the 1890s and from circa 1910 to 1949. Included are bungalow-style duplexes and simple bungalows; hipped cottages; central passage houses; and Minimal Traditional style houses from the 1940s. The building typology defined as Type 2 in this nomination is essentially a double pen, one of the earliest types of mill houses noted by D. A. Tompkins in Cotton Mill, Commerical Features. Dallas Mill's Colonial Revival style manager's house remains as it does in Huntsville's other three mill villages. In addition, there remains an athletic stadium with a turreted entrance (1934, Inv. # 6, Photos #6-7), a commissary (ca. 1925, Inv. #106), three contributing commercial buildings (Inv. #s 1, 2, Photo #42, and 182, a church (circa 1925, Inv. # 58, Photo #31), and a water works building (circa 1945, Inv. 26, Photo #43). Additionally, two ca. 1960 brick ranch style houses (Inv. #s 45 and 61), one contributing Minimal Traditional style house (Inv. # 103) and a former fire station (circa 1960, Inv. #24) typify the modest development that occurred in the years after the closure of the mill. The small scale and utilitarian design of these resources reflects the working class character of the district.

Community Planning and Development: The Dallas Mill Village Historic District is significant for its documentation of a planned Southern textile mill village from 1891 to circa 1949. Begun in 1891, the company initially built its mill and then constructed the residential village between the 1890s and 1949. The industrial portion of the village was laid out adjacent to the Norfolk and Suffolk Railroad. The residential village (originally known as Lawrence Village) was developed on land adjacent to the mill by company investor Oscar Goldsmith. Under Goldsmith's planning and implementation, the company initially built houses adjacent to the mill in the 1890s (Inv. # 48, Photo #29, and Inv. # 148, Photo #2). Following that, between circa 1910 and circa 1949, the company planned and built additional houses which remain extant from each decade, a manager's house (Inv. # 44, Photo #26), and various amenities including an athletic stadium and athletic field (Inv. # 6 and 7, Photos

#6-7), a church (Inv. # 58, Photo #31), a commissary (Inv. # 106) and a drainage system (Inv. # 25, Photo #44) and water system (Inv. #s 26 and 27, Photo #43).

Developmental history/additional historic context information (if appropriate)

Historical Narrative

Dallas Mills was established in 1890 by the North Alabama Improvement Company (NAIC). Formed by two brothers, Michael and James O'Shaughnessy, NAIC included eighteen Huntsvillians and two Memphis businessmen as its initial investors. Its stated purpose, in part, was to "encourage, promote, procure, and secure immigration to North Alabama of the best and most skilled class of persons from all industrial pursuits" (Ryan, p. 10). As early as 1882, the NAIC had begun a promotional campaign lauding the virtues of Huntsville and Madison County as a site for business development (Perry, p. 122).

By the 1890s, the O'Shaughnessy brothers had gained extensive experience in industrial investments including the cottonseed oil business. Their business interests reached from Florida to Georgia and even into Nicaragua, where the brothers invested heavily in the digging of a canal to aid their shipping endeavors. Of Irish descent, their father had settled in Cincinnati and established what was to become a highly successful investment business there in the early nineteenth century. Michael and James launched their own entrepreneurial efforts from their Cincinnati home base and, after the Civil War, ventured into Alabama. They proved prolific in their business ventures such that, according to local lore, Alabamians never referred to them as carpetbaggers because "there wasn't a carpetbag made that could hold all of their deeds and securities" (Stephens, Historic Huntsville).

As an enticement to Trevor B. Dallas of Nashville to locate a new mill in Huntsville, the North Alabama Improvement Company donated fifty acres of land for the mill site and purchased \$25,000 in stock in the mill. Initial capitalization was \$500,000, the majority of which was derived from investors outside of Huntsville. In addition to T. B. Dallas, G. M. Fogg of Nashville and S. M. Milliken of New York, who each subscribed \$20,000, another forty-four subscribers, of whom thirty-two were from outside the state, subscribed for a total of \$276,500 (Ibid.). In return for stock, nine out-of-state investors contributed \$110,000 worth of machinery and supplies (Ryan, 13). Alabama investors put \$25,000 into capitalization of the Dallas Mill (Perry, 147).

By 1891, the first phase of the mill, the north end (shown on the 1928 Sanborn Map as Mill # 2 (Sanborn Map, 1928), had been completed. One year later, Dallas Mill launched production with 25,000 spindles, 750 looms, and 750 employees. During its first eight years of operation, the mill averaged between 500 to as many as 1,200 employees (Stewart, p. 5). A weaving mill, it produced unbleached cotton sheeting, which was initially shipped north for bleaching and further processing. The company also bleached some of its own goods; company records list frequent expenditures for bleach. Dallas's unbleached or grey goods were sold under the names "Dallas, Wilton & Hadley." Sheets and pillowcases were marketed under the "Sylvan" label (Dallas Mills archival records, Huntsville-Madison County Library Heritage Room).

In 1892, the company issued another \$150,000 in capital stock financed by Seth Milliken through his Deering, Milliken and Company, a cotton commission house with offices in Boston and New York. This company then became the sole marketing agent for Dallas Mill, and Seth Milliken replaced T. B. Dallas as the mill's president in 1894 (Perry, 123). Like the majority of Alabama's post-War cotton firms, most of Dallas Mill's investment continued to come from outside the Southeast, principally from Northeastern investors who contributed over \$400,000 of the initial \$500,000 of capitalization and one hundred percent of the next \$150,000 (Ibid., p. 152).

In 1899, the company hired famed Boston textile mill designers, Lockwood Greene, to design its second building (Manufacturer's Record, 1900). Completed the next year (shown on the 1928 Sanborn Map as Mill #

1), but later razed, the mill was a five-story Italianate style brick building, according to a 1978 National Register of Historic Places nomination, that was "superior to the average late century mill in Alabama." The structure, it continued, "is a good example of design which is functional and handsome without being elaborate" (National Register of Historic Places nomination, 1978).). By then, the company began to build houses for its workers adjacent to and just east of the mill; two remain intact, a Type 2 wood duplex on Humes Avenue (Inv. # 48), and an L-plan house on Pratt Avenue (Inv. # 148).

Soon after completion of the second mill and during this first phase of housing development, scandal plagued the company. In July 1900 English Clark, a Negro, allegedly raped a white operative at Dallas Mills. In response, a mob of 1,000 mill workers walked off their jobs, effectively shutting down the factory, and marched to the jail. They lynched Clark in front of a crowd said to have swelled to 6,000. Dallas Manufacturing acknowledged that its employees had carried out the lynching and agreed to repair the damage to the jail (Crabtree, 148).

By 1901, calm had returned and Dallas had nearly doubled both its operations as well as its number of employees. By then, the mill was operating at 50,000 spindles with 1,200 employees (Davidson) who received an average of 68 cents for a 10.65-hour workday (Stewart, 4). With production in full swing, the company needed more homes and services for its workers. Oscar Goldsmith of Lawrence, Massachusetts, an original company investor, began development of the land surrounding the mill, previously the site of a Spanish American War training camp, for the company's village. Under Goldsmith's direction, the company began to build what was then known as Lawrence Village consisting of worker housing just east and south of the mill for which families were charged one dollar per room per month for rent (Stewart, 6). Churches, stores, a post office, and Rison School, named in honor of a local Huntsville businessman and civic leader were also built as well as a library and barn that were shared with adjacent Abingdon (later Lincoln) Mill. He also built a blacksmith shop and employed two nurses to attend to the health of workers and their families (Crabtree, p.148). None of these buildings remain.

Throughout the 1910s and 1920s, the Dallas Mill operation grew to its peak, but its worker pool did not grow likewise. In 1910, mill production jumped to 57,408 spindles without a corresponding increase in operatives (Ibid.). By 1918, the mill was operating at 58,752 spindles with a decrease in operatives to 900, down from the 1,100 employees who had worked there on 53,480 spindles in 1905-06. "Clearly," according to one mill village historian, "more production was being required from fewer employees" (Ryan, p. 130).

Nonetheless, perhaps to compensate for its increased demand from its workers, the company provided many amenities during the same period. By 1912, 122 village houses had outdoor "water closets;" indoor toilets were added during the 1920s. One year later, according to company minutes, the company authorized \$5,000 to build a YMCA at the corner of Rison Avenue and 3rd Street (now Dement Street) for the "benefit of mill employees" including those of adjacent Abingdon Mills. Employees were required to match the company's investment (Minutes of the Board of Directors, November 22, 1913). In 1914, the 8,100 square foot building, designed by Edgar L. Love and constructed by Glidwell Brothers, was completed with steam heating and "knob and tube" system of electric lighting (Manufacturer's Record, November 27, 1913). It was later razed in the 1970s for suburban development.

The company also built many homes during the 1910s including one two-story Colonial Revival manager's house immediately east of the mill complex on Humes Avenue (Inv. # 44). In 1917, moreover, the Board of Directors authorized construction of seventy-eight six-room additional duplexes at a cost of \$850 each on Dallas Street, Humes Avenue, and O'Shaughnessy Avenue (Minutes of the Board, November 9, 1917). That same year, streets were curbed and gutters added (Heritage of Madison County). Two years later, electric lights were installed in the village at a cost of \$6,145.06 (Minutes of the Board of Directors, 1919).

The decade of the 1920s began as a bonanza year for the company, which reported a profit of nearly \$800,000 for 1920, up from \$6,559 in 1919 (Crabtree, 157). Consequently, the company built many more homes, as well

as additional amenities during the decade. In 1920, the company authorized \$150 to "pay the preacher" for the village's Christian Church (Minutes of the Board of Directors, November 6, 1920). The following year, the company authorized an expenditure of \$2,750 for the Fifth Avenue Baptist Church "provided the church raises an equal sum" (Minutes of the Board of Directors, November 14, 1921). In 1922, another \$2,500 was authorized for the Baptist church, and an unspecified contribution was authorized for the construction of a Methodist church on a "per capita basis" (Minutes of the Board of Directors, October 23, 1922). The Church of God, a simple wood front gabled church with a quarried stone foundation, was built during this period and remains on Humes Avenue (Inv. # 58) from this development phase.

In 1920, company directors agreed to spend "a sum necessary to erect a suitable school building of brick to take care of the school children of the employees of the Dallas Manufacturing Company"; soon thereafter, the \$75,000 building was complete but is no longer extant (Minutes of the Board of Directors, November 6, 1920). In 1921, moreover, a water works system was installed and water tank erected for the village (Inv. # 27).

Two years later, in 1923, the company planned an additional thirty to forty superintendent and foremen's dwellings at a combined cost of \$100,000 (Manufacturer's Record, March 22, 1923). That same year, the company hired Robinson Lumber Co. to build seventeen cottages for \$1,000 each on Dallas Street and Humes Avenue where several remain (Manufacturer's Record, April 15, 1923). Two years later, erection of another sixteen duplexes was completed on Stevens Avenue, and another sixteen duplexes were completed on O'Shaughnessy Avenue (Manufacturer's Record, June 25, 1925).

Besides these housing types, the Dallas Mill Company built an extraordinarily wide range of duplex and single family housing types and styles throughout the village during the 1920s. Included were many Type 1 houses concentrated on Beirne, Humes, and Stephens Avenues, and Type 2 duplexes concentrated on Rison and Stephens Avenues; as well as some Type 3 duplexes on Rison and Stephens Avenues, Type 4, and Type 7 duplexes. In addition, Type 5, 6, and 8 single-family bungalows were constructed.

In 1925, the company converted to a dual system of steam and electricity, which it maintained until 1940 when it converted completely to electric power (Davidson, "Selected Textile Directory Listings for Huntsville, Alabama"). In addition, that same year, it appropriated \$20,000 for "welfare work in the village of the company for the ensuing year" from which the domestic science teacher's salary was taken. The bulk of the money, however, was used to cover salaries of other teachers at the school "after County funds had run out" (Minutes of the Board of Directors, November 17, 1925).

In the 1930s, the company planned construction of a grandstand, which the Board authorized for use of "our athletic teams" (Minutes of the Board of Directors June 5, 1928). Located on Schiffman Street, the field's present grand massive brick wall with twin entrance turrets was completed in 1934 (Inv. #6, Photos #6-7). Across the street, a simple playing field was also provided in 1928 and remains extant (Inv. # 7). There was also a Dallas Mills' kindergarten which had been located at the corner of Oakwood Avenue and Dallas Street since at least 1928, according to the Sanborn Maps. It is no longer extant (Sanborn Map, 1928).

Following the 1929 crash of Wall Street, Dallas Mill recorded a 1930 loss of \$279,039 (Crabtree, 157). That year, according to one study, of 1,281 mills operating in the South at that time, only 200 reported a positive cash flow (Martinson, Revitalization and Preservation in Alabama's Textile Mill Villages). Within four years, Dallas, along with other textile mills and other industries nationwide, would find itself in the midst of labor unrest and violent strikes. Partly in an attempt to better the lot of the mill employees, President Franklin Roosevelt signed into law the National Industrial Recovery Act (NIRA) in 1933 ("The Huntsville Parker," September 1955, p. 25).

The new law prescribed a 40-hour work week, two work shifts, a minimum weekly wage of \$12 in the South (\$13 in the North), elimination of child labor for those under the age of 16, and, perhaps most significantly, a provision allowing for collective bargaining. In spite of the fact that the NIRA specifically called for the right of

the workers to collectively bargain, in practice, mill workers who joined a union were often quickly terminated ("Huntsville Parker, " p. 26).

Complaints from Southern mill workers mounted during the 1930s included the demand for a 40-hour work week, as well as for a ban against so-called "stretch out" practices where workers would be required to operate more than one machine for no extra pay (Stephens, pp. 90-91). It was left to the United Textile workers of America, which increased its membership 675% in 1933, to rally around its workers (Stephens, p. 91). Helped by union organizer John Dean and Huntsville native Mollie Dowd, the United Textile Workers declared a national walkout on July 17, 1934, demanding higher wages, among other reforms. Nearly two-thirds of Alabama's 30,000 textile mill workers, including those at Dallas Mill, joined the walkout. Heavily unionized Huntsville, was said to have taken on the appearance of an "armed camp," during this period, with police standing at the ready for frequent confrontations with striking mill workers. Union organizers toured the area, driving trucks and cars, calling out to the "lint-heads" to "walk off their jobs." There were shootings, riots, and Alabama's governor moved to mobilize the state's militia in an effort to quell the uprisings of disgruntled workers. At one point, Dean was kidnapped and driven from his Huntsville hotel room at gunpoint. Taken to Fayetteville, Tennessee, Dean somehow managed to contact friends who rescued him and returned him to Alabama (Flynt, p. 149).

Issues of The Huntsville Times during the summer of 1934 furnished daily accounts of the mill labor complaints with such headlines as "Number of Local Workers Quitting Jobs Put at 4,000" (July 17) "Strikes Cut Off City's Food "(July 18) and "Pickets on Duty, During Day, Night, Dean Estimates 20,000 Out Over State by This Morning" (July 19). On July 17, 1934, the newspaper reported that the Dallas Mill had 800 operatives on strike as of the previous evening when the workers walked out immediately after the close of the night shift. Monroe Adcock, president of the Dallas local union, urged the strikers not to destroy mill property and requested that all persons "refrain from drinking during the strike" (The Huntsville Times; July 17, 1934). The strike of 1934 lasted for two months, and the following year, a second strike persisted several months (History of Madison County, 1998).

During the late 1930s and 1940s, in spite of this tumult, the company continued to build houses, mostly single family, in the mill village, as well as other ancillary buildings. By the end of the decade, in 1949, however, the mill was sold to Claude Elrod and Eugene Buffington. Due to chronic labor unrest, according to some sources, however, the mill closed that same year.

Verbal Boundary Description (describe the boundaries of the property)

The boundaries of the Dallas Mill Village Historic District are indicated on an accompanying scaled map. The map was based on information obtained from U.S.G.S. topographic maps, county tax assessor, and U.S.G.S. satellite images.

Boundary Justification (explain why the boundaries were selected)

The boundary includes the portions of the former Dallas Mill village and site that retain sufficient integrity to convey a sense of the historic time and place of the district.

11. Form Prepared By

name/title Pamela S. King; edited by David B. Schneider (reviewed by Susan Enzweiler, AHC NR Coordinator)
 organization Historic Huntsville Fdn.; Schneider Historic Preservation, LLC date 8/10/2010
